Social Media as Modern Tool

Dr. R. G. Suralkar

(Smt. Sindhu Bai Jadhav Arts & Science College, Mehkar)

It is universally accepted by all people that the knowledge is the highest power on this earth. It means that 'knowledge is power'. Weapon power ends, money power ends, muscle power ends but knowledge once gained will never ends. Knowledge once gained can never be vanished. It is useful for the years to come, from one generation to another. If one gives or shares the knowledge then it will become double for the person who gives it to the others. Knowledge given to others, gets the satisfaction. The importance of knowledge is shown here which is in Sanskrit language.

विद्या नाम नरस्य कीर्तिरनुला भाग्यक्षये चाश्रयो धेनुः कामदुष्या रतिश्च विरहे नेत्रे तृतीयं च सा ।

सत्कारायतनं कुलस्य महिमा रत्नैर्विना भूषणम् तस्मादन्यमुपेक्ष्य सर्वविषयं विद्याशिक्षणं कुत ॥

(<http://sanskritslokas.com/vidya2.html>)

Gist:

Knowledge is everlasting fame; When destiny is destroyed, it gives shelter, it is like a Kamdhenu (A Cow God Which gives the person what he wishes), it is like a beloved who accompanies in dejection, it is a third eye, it is a temple of hospitality, it is total glory, there is no jewel ornament; therefore, leave all other subjects and become knowledgeable person 4.

From the above quotation, the importance of knowledge can be easily understood. The present research article is a sincere attempt to provide the information of using the social media for the learners in degree colleges.. Media is a means of communication which shares the information and knowledge. Media is responsible to provide the worldwide happening events in all fields. It gives us the instructions and the entertainment. Media is the most powerful source of knowledge which collects all type of information from the dustbin to the heaven and thus it is a perfect medium of resource for the Universe. It is becoming more and easier to share the information with the world because of the social media. This research article is a sincere attempt to focus on the use of social media as a knowledge source of literature. The word media and its dictionary meaning and its history can be understood in the following words. "The definition of media is the plural of medium, or ways to communicate information".

With this definition one can easily understand that the media and its prime focus is for the sake of the society. Due to media the world is connected. The globe is like a small village only because of the social media. Now a day the social media is the fastest communication source because of the invention of the internet and the search engine software Google. We can see that media can be divided into two main types i.e. print media and wireless media. Following information will help us to understand the history of the media. History of Media:

Newspaper - The first newspaper in America was released in Boston in 1690.

Radio - Radio, first commercially broadcasted in the U.S. in 1920, provided content and data in a way that was before unheard of. Actors on the radio could tell stories or broadcast serials, that listeners would tune in regularly to hear.

Television - With the 1936 launch of the British Broadcasting Corporation (BBC), the public could watch the news for themselves and could be entertained by the pictures and actors.

Movies - Screen actors became spokespersons for products being bought in grocery stores and department stores.

Wireless - During the 1990's and 2000's, media began to take on a whole new meaning with the advent of the Internet. The world is now nearly totally wireless. Information - videos, movies, music, pictures, people can be accessed from anywhere, at anytime, with wireless phones, modems, or computers the size of note pads.

An example of media is materials used in the fine arts such as paint and clay. An example of media is *The New Yorker* magazine. Examples of media are CDs and DVDs. An examples of media are newspapers, television, radio, printed matters are available on Youtube. The most used media today is the social media because of the invention of the computer, internet and the search engine Google Softwares like Whatsapp, Facebook, Messenger, Instagram, Twitter and Youtube have Social media is defined by its interactivity, connectedness, and user generated content. In todays society, the user of media has become necessary daily activity. Social media is typically used for social interaction and access to news information, and decision making. It is valuable communication tool with others locally and worldwide, as well as to share, create, and spread information. Social media can influence customers purchase decisions through reviews, marketing tactics and advertising. Essentially, social media vastly impacts our ability to communicate, form relationships, access and spread information, and to arrive at the best decision. These social networking sites have increasingly grown beyond personal use. Recently, employers have begun using social networking sites to examine the background of their prospective candidates, as well as to host interviews via facebook or other social media technology tools. One of the largest industries that social media has had an effect on the news and journalism. Since the

Internet is now the fastest and easiest way to get news, print media is diminishing and publication are being forced to post their articles online.

Now a days the social media is the fastest communication source because of the invention of the internet and the search engine software Google. We can see that media can be divided into two main types i.e. print media and wireless media. With the help of these softwares, we can easily send unlimited literary information to the individual person as well as to the group of people. We can upload it on the Facebook world then it can be easily done. These softwares are easily free to use for its user. The only mandatory element for the successful running of these softwares is the internet facilituy and with all this one can easily keep thje world literature in the mobile phones and even it can be keep in a pocket.

Social media has changed the way we communicate. Whether its Twitter, Instagram, Facebook or a host of other apps. It has given all of us an immediate way to connect and share with friends, family and those who share our interests. When it comes to our union, social media is a powerful tool to communicate to the other people of countries. Whether you like it or not, its here to stay. But how does it play into building our union ? First and foremost Facebook does not replace our union meetings. Coming together to discuss the issues of the day and share views in person is a cornerstone of our union democracy . Real members voting on real issues that's what takes place in a union meeting and social media is not a surrogate for that. It is easy loose

that lesson in an age where social media is thought to give an instant temperature read of where members stand

Social media has become the global source for sharing of the literature. With the help of these softwares, we can easily send unlimited literary information to the individual person as well as to the group of people. We can upload it on the Facebook and if we wish to show it to the entire Facebook world then it can be easily done. These softwares are totally free to use for its user. The only mandatory element for the successful running of these softwares is the internet facility and with all this one can easily keep the world literature in the mobile phones and even it can be keep in a pocket. Here are a few images of the softwares, which we can use as a social media for the sharing of the literary knowledge. These few links quoted above over here are just for the understanding of the readers of literature. This article is an attempt to provide a few web sources of using social media for the learners of the literature. One can easily find uncountable knowledge source of literature with the help of social media from the web source
